

Wawa

Wawa is found in most countries in West Africa, especially Nigeria, Ghana, Ivory Coast and the Camerouns. The timber is creamy-white to pale yellow in colour with little or no distinction between the sapwood and heartwood.

Wawa dries quickly and has good strength properties.

The main use for Wawa lippings are for coffin beading, whereas in raw material form, it is used for interior joinery.

Wawa	
Durability	Not durable
Strength	Not strong
Density	390
Colour	White to cream
Grain	Fine & even
Texture	Medium
Drying	Quickly
Machining	Well
Screwing / Nailing	Pre-drilling recommended
Botanical Name	Triplochiton Scleroxylon
Origin	West Africa

Available Sizes (mm)
7 x 17 x 1829mm
7 x 17 x 1982mm
7 x 17 x 2134mm
